## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A, drawn to a discrete component of which at least one of the lasers and the modulation means are the discrete component.

Species B, drawn to a monolithic component formed in the substrate of which at least one of the lasers and the modulation means are the monolithic component.

Species C, drawn to a beam shaping means comprising one or more lenses.

Species D, drawn to a beam shaping means comprising a tapered hollow core optical waveguide.

Applicant is requested to elect either species A or species B AND either species C or species D.

Regarding species C and D these species are mutually exclusive as there are four possible

Combination of the waveguides to give four combinations of the optical path such as:

lens - tapered hollow core optical waveguide

tapered hollow core optical waveguide - lens

tapered hollow core optical waveguide - tapered hollow core optical waveguide

lens - lens

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species A reads on claim 2  
Species B reads on claim 4  
Species C reads on claim 19  
Species D reads on claim 20

The following claim(s) are generic: 1 and 18.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: to be monolithic it must all be fabricated as a single structure wherein to be a discrete component it is formed separately from the rest of the structure.

Furthermore, Regarding species C and D these species are mutually exclusive as there are four possible Combination of the waveguides to give four combinations of the optical path such as:

lens - tapered hollow core optical waveguide

tapered hollow core optical waveguide - lens

tapered hollow core optical waveguide - tapered hollow core optical waveguide

lens - lens

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
